

Dave Brubeck Exhibit – Information for Venue Staff

Security

There is an iPod built into the intro panel (with Dave's Hands). The housing is secure, but it could still be susceptible to theft.

The speakers are removable too, but will be left up all the time.

Volume

There is an easily accessible volume control on the speakers behind the two panels that have audio. Any staff is welcome to adjust the volume as needed. If silence is needed, do not turn anything off. Turn the volume all the way down.

The iPod in the intro panel plays 5 Brubeck songs on a constant loop that lasts about 30 minutes.

The Jazz panel has two buttons to hear Dave explain two major parts of his music. Each clip is about one minute long.
